

[Vincenzo Ferme \(@VincenzoFerme\)](#) is a Ph.D. Candidate at the [University of Lugano \(USI\)](#), Switzerland, supervised by [Prof. Cesare Pautasso](#). He has been awarded his degrees (summa cum laude) in Informatics by the [University of Federico II](#), Naples in 2010 (bachelor) and the [University Milano-Bicocca](#), Milan in 2013 (master). His master specialisation was in Design and Development of Software Systems, with a thesis titled “JCodeOdor: A Software Quality Advisor Through Design Flaws Detection” focused on quality and evolution of software systems.

Before starting his Ph.D. he was a Software Engineer and Java Developer at [Connexun S.r.l.](#) for one year, where he implemented a software system to discover and identify Points Of Interest relevant to cross-cultural communities through data analysis and semantic techniques.

Currently as part of his Ph.D. research he is involved in the [BenchFlow Project](#). The goal of the project is to design the first benchmark for assessing and comparing the performance of workflow management systems.
